

CURRICULUM VITAE

A.B

Tech Lead Data & Analytics 10+ years Of Experience

PROFESSIONAL SUMMARY

- Tech Lead Data & Analytics with 10+ years of experience designing, modernizing, and governing enterprise analytics solutions across global and operational environments.
- Specialized in Microsoft Fabric, Power BI, cloud data platforms, semantic modeling, analytics performance engineering, data governance, and AI-ready data foundations. Experienced in supporting large-scale analytics ecosystems across Finance, Supply Chain, Marketing, Manufacturing, Sales, and Human Resources.
- Microsoft-certified in Microsoft Fabric, Azure Data Analytics, and Power BI, with experience in GCP BigQuery, Databricks, Snowflake, SAP HANA, SQL, Python, and automation.
- Combines hands-on technical depth with platform leadership to deliver secure, scalable, high-performing, and trusted analytics products. Focused on enabling governed self-service analytics, modern cloud data architectures, reliable semantic layers, and AI-assisted decision support.

CORE EXPERTISE

- Enterprise Data & Analytics Architecture
- Microsoft Fabric, Power BI & Cloud Analytics Platforms
- Semantic Modeling, KPI Design & Analytics Engineering
- Data Governance, Security, Access Management & Center of Excellence
- Cloud Modernization: Azure, Google Cloud BigQuery, Databricks & Snowflake
- Performance Engineering, Capacity Optimization & Platform Reliability
- Agentic AI, Generative AI Enablement & Analytics Automation
- Technical Leadership, Stakeholder Management & Global Team Enablement

PROFESSIONAL EXPERIENCE

Mar 2023 – Present
Tech Lead Data & Analytics
L'Oréal Beauty Tech
Global Data Platform

Tech Lead Data for the Global Data Platform

Provide technical leadership for global analytics capabilities within L'Oréal's data platform, supporting Finance, Supply Chain, Marketing, and other business domains. Contribute to the evolution of a scalable, governed, secure, and AI-ready analytics ecosystem.

Analytics Platform Architecture & Delivery

- Lead the design and operational evolution of enterprise analytics solutions supporting Finance, Supply Chain, Marketing, and other business domains.
- Partner with data engineering, cloud infrastructure, security, product, and business teams to translate analytical requirements into scalable and maintainable data products.
- Define reusable standards for semantic modeling, KPI design, technical documentation, data lineage, and secure data-access patterns.
- Provide senior-level Power BI expertise and L4 technical support, collaborating with Microsoft product teams on high-priority escalations.
- Diagnose and resolve complex issues across reports, semantic models, gateways, service connectivity, tenant operations, and platform reliability.

Microsoft Fabric & Cloud Data Modernization

- Lead technical design and contribute to the analytics workstream for the modernization of critical reporting, semantic-model, and data-transformation workloads from GCP BigQuery toward Azure and Microsoft Fabric..
- Define phased migration patterns for Power BI semantic models, reporting workloads, and ETL/ELT pipelines across Azure Data Lake, Synapse, and Fabric OneLake.
- Re-engineer DirectQuery and composite models to align with Fabric lakehouse architecture while maintaining performance, reliability, and scalability.
- Replicate access-control and lineage requirements across environments; validate data fidelity and reporting consistency through automated reconciliation processes using PowerShell, Python, and Power BI REST APIs.
- Enable the coexistence of legacy GCP assets and Azure/Fabric workloads during transition, minimizing disruption for business users.

Governance, Security & Operational Excellence

- Establish and promote governance standards for Power BI and Fabric, including workspace policies, access roles, deployment practices, and controlled release processes.
- Implement Role-Based Access Control and Row-Level Security across data sources, semantic models, and analytical applications.
- Build monitoring dashboards for capacity and usage tracking; support tenant administration and Premium/Fabric capacity optimization.
- Train global teams and promote standards for data quality, naming conventions, KPI consistency, documentation, and data lineage.

Performance Engineering & Analytics Reliability

- Diagnose end-to-end performance issues across data sources, semantic models, reports, queries, visuals, and capacity resources using DAX Studio, SQL Profiler, and BigQuery logs.
- Lead a DirectQuery performance optimization task force, redesigning data models and implementing hybrid architectures, aggregation tables, query-folding improvements, DAX optimization, incremental refresh, and composite models.
- Achieved performance improvements of up to 70% for selected critical analytics workloads and contributed to the internal Power BI Optimization Framework.
- Developed an automated Power BI performance stress-test and validation tool to simulate concurrent user loads, monitor performance metrics, and support deployment-readiness certification.

	AI-Enabled Analytics & Automation • Prepare governed and documented semantic data assets to support enterprise Generative AI and AI-assisted analytics use cases. • Design agentic AI workflows to automate analytics best-practice validation, governance-policy application, semantic-model readiness checks, and technical documentation generation. • Integrate analytics knowledge assets with an internal enterprise Generative AI platform, enabling governed natural-language access to analytics standards, policies, and technical knowledge. • Improve analytics delivery consistency and productivity by operationalizing reusable rules, policies, technical guidance, and documentation practices through AI-assisted workflows.
Aug 2018 – Mar 2023 BI, Data & ERP Consultant KIA	Delivered business intelligence, data integration, and ERP initiatives supporting supply chain, sales, customer relationship management, and human resources operations. Supply Chain Analytics & Business Intelligence • Led the delivery of an end-to-end analytics solution covering procurement, logistics, manufacturing, inventory, sales, and CRM, supporting both operational teams and executive decision-making. • Facilitated stakeholder workshops to define KPI frameworks, reporting priorities, analytical dimensions, and business requirements. • Integrated SAP, Produmex, Odoo, HR Access, and Excel data through Talend ETL processes; designed dimensional models and star schemas with data-cleansing and transformation rules. • Developed SAP HANA SQL queries, DAX calculations, and Power BI dashboards to monitor supplier compliance, transportation costs, delivery performance, inventory, sales, and operational KPIs. • Deployed Power BI solutions with role-based access controls and workspace governance; delivered user training, technical documentation, and best-practice guidance. CRM & HR Transformation • Led the implementation of an Odoo CRM solution and customer portal, improving sales-order visibility, customer management, after-sales monitoring, and CRM reporting. • Led the deployment of Sopra HR Access for HR operations, including payroll structures, talent management, time and attendance, testing, data-quality controls, and workforce analytics dashboards.
Jun 2016 – Aug 2018 BI, Data & ERP Consultant Hyundai	Delivered manufacturing analytics and ERP transformation initiatives to improve operational visibility, supply chain execution, and data quality. Manufacturing Performance Management & Analytics • Designed and implemented a centralized manufacturing analytics solution, providing near-real-time visibility into production, warehouse operations, inventory, costs, and quality performance. • Defined operational KPIs with manufacturing and supply chain stakeholders, including production efficiency, production costs, finished-product and raw-material quality, and inventory turnover. • Consolidated SAP HANA, CSV, Excel, and operational data through automated ETL processes; developed Power BI dashboards that enabled teams to monitor trends, identify issues, and support timely decisions.

	SAP Business One HANA & Produmex ERP Implementation • Led the end-to-end implementation of SAP Business One HANA integrated with Produmex, supporting the design and rollout of manufacturing and supply chain processes. • Led requirements analysis, cross-functional workshops, system configuration, technical installation activities, master-data migration, end-to-end testing, and go-live readiness. • Developed operational reports using SAP Crystal Reports and provided post-go-live support, data-quality practices, and end-user training to support sustainable adoption.
Oct 2015 – Jun 2016 ERP Consultant RENAULT	Supported the deployment and operational adoption of a dealer management system across authorized dealer agencies. • Supported the implementation and administration of a Dealer Management System (DMS) to centralize dealer operations across the authorized network. • Deployed and supported the platform for multiple dealer agencies, helping ensure operational continuity and user adoption. • Conducted business-needs analysis and delivered end-user training to improve system utilization and user satisfaction. • Collaborated with development and business teams to support system integration and improve data consistency across dealer operations. • Established data-consolidation and monitoring processes to strengthen data integrity and synchronization between dealer systems. • Produced monthly performance and management reports aligned with operational-monitoring and strategic-management needs. • Contributed to the design and implementation of digital solutions supporting dealer operations and customer engagement. • Supported network and security administration activities using Sophos solutions.
Nov 2014 – Jun 2015 DATA ANALYST INTERN SONELGAZ	Contributed to the delivery of a business intelligence solution supporting human resources reporting and workforce decision-making. • Gathered requirements with Human Resources stakeholders to define reporting needs, analytical dimensions, workforce indicators, and management priorities. • Designed and implemented a Business Intelligence solution supporting HR analytics and workforce-planning activities. • Developed and orchestrated ETL processes using Talend to integrate and transform HR data from multiple sources. • Defined and optimized HR KPIs, including payroll evolution, internal mobility rate, recruitment cost, and workforce-monitoring indicators. • Developed SQL queries in SpagoBI to support KPI calculation and performance-optimized data retrieval. • Designed and deployed interactive reports and dashboards to support payroll analysis, workforce monitoring, and HR decision support.

TECHNICAL SKILLS

Data & Analytics Platforms	Microsoft Fabric · Power BI Desktop · Power BI Service · Power BI Premium · OneLake · Lakehouse · Semantic Models · Power BI Report Server · Power BI Embedded · Power BI REST API · Azure Synapse Analytics · Azure Data Factory
Cloud & Data Platforms	Microsoft Azure · GCP BigQuery · Databricks · Snowflake · SAP HANA · SAP Business One HANA · Hadoop · Spark
Data Modeling & Analytics Engineering	Dimensional Modeling · Star Schema · Snowflake Schema · Data Warehouse Design · Semantic Modeling · DAX · Power Query · DirectQuery · Composite Models · Incremental Refresh · Aggregation Tables · Query Folding · DAX Optimization · Performance Tuning
Data Integration & Automation	Azure Data Factory · Microsoft Fabric Pipelines · ETL/ELT · Python · PowerShell · SQL · JavaScript · REST APIs
Governance, Security & Operations	Data Governance · Data Quality · Data Lineage · Row-Level Security · Role-Based Access Control · Access Management · Tenant Administration · Workspace Governance · Capacity Management · Center of Excellence · Monitoring and Operational Support
AI-Enabled Analytics	Enterprise Generative AI · Agentic AI · LLM-Enabled Analytics Workflows · AI-Assisted Documentation · Semantic Model Data Readiness · Analytics Automation · AI Governance Foundations · Natural-Language Analytics · Governed Data Products
ERP & Business Applications	SAP Business One HANA · SAP B1 Analytics · Produmex · SAP Crystal Reports · Odoo CRM · Sopra HR Access
Project Management & Methodologies	Agile · Scrum · SAP Activate · Accelerated Implementation Project · Stakeholder Workshops · Requirements Analysis · User Acceptance Testing · Technical Documentation · End-User Enablement

TRAINING AND CERTIFICATIONS

OCT 2025	Microsoft Certified: Fabric Data Engineer Associate (DP-700)
SEP 2025	Microsoft Certified Trainer (MCT)
JUN 2024	Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
DEC 2023	Microsoft Certified: Azure Data Fundamentals (DP-900)
SEP 2023	Microsoft Certified: Azure Enterprise Data Analyst Associate (DP-500)
FEB 2023	Databricks Lakehouse Fundamentals Accreditation
JAN 2023	Microsoft Certified: Azure Fundamentals (AZ-900)
OCT 2021	Microsoft Certified: Data Analyst Associate (DA-100) - (PL-300)
JUL 2017	SAP B1 Application Associate, SAP B1 Activate Project Manager
JUN 2015	Engineering Degree in Computer Science - ESI
